

Table of Contents

1. Adaptive Dynamic Surface Control of Chaotic Micro-Electro-Mechanical System with Unknown System Parameters and Dead-Zone Input <i>Shaohua Luo, Suqun Cao, Zhong Chen and Sujatha K</i>	1-11
2. Five Level Inverter Fed Squirrel Cage Induction Motor Drive with Reduced Number of Power Elements <i>Harikrishnan R, Ravi C N and Vimala S</i>	12-18
3. Intelligent Web based Home Automation and Security System using Raspberry PI <i>Harikrishnan R, Ravi C N, Liji S Job and Rudra J Kumar</i>	19-24
4. Enhancement of Smart Grid Performance through Logic based Fault Tolerant MPSoC <i>Vijayakumar D and Malathi V</i>	25-34
5. The ASVI - Assistance System for Visually Impaired <i>Arvind Prasad, Govindsingh H, Hari Krishnan R and Ravi C N</i>	35-39
6. Biometric Recognition System (Algorithm) <i>Rahul Kumar Jaiswal and Gaurav Saxena</i>	40-47
7. A Comprehensive Measurement Placement Method for Power System State Estimation <i>Rakesh J Motiyani and Ajitsinh R Chudasama</i>	48-54
8. Voltage Control of DC to DC Converter in Integrated Renewable Energy System through Fuzzy based GA <i>Harinadha Reddy K, Raghu T and Prasad Rao K P</i>	55-60
9. Placement of Synchronized Measurements in Power Networks for Redundant Observability <i>Satyendra Pratap Singh and Singh S P</i>	61-68
