

## **PREFACE**

It gives me immense pleasure in writing this preface to the proceedings of the Sixth International Conference on Recent Trends in Information, Telecommunication and Computing – ITC 2015. The proceedings comprise of the research outcomes of 24 researchers from premier technical institutes and research organizations. All these papers are very significant and focus on the latest advancements in Information technology & other IT enabled areas.

Information Technology plays a key role in national growth. The dynamic and demanding context of IT requires advancements of research in relevant areas. The changes in information technology influence almost every sphere of life. To deliberate on such advancements in research conferences of this nature can greatly contribute.

This conference is targeted towards researchers, practitioners, professionals, academicians and students – to share innovative ideas, working experiences, recent trends, research outcomes and provide future directions related to Information Technology. I am pleased to see that the various research groups from different parts of our country are presenting their research papers on almost all the current aspects of Information Technology.

I do hope that the results and techniques which are compiled in the proceedings will be useful to all concerned like researchers, academicians, students and technologists for the welfare of mankind and society at large. I sincerely believe that this conference and its future editions will generate strong interest and support from the industry and academia.

I wish the conference a resounding success.

Dr. Rajesh K Bhatia
