|                                                                                                                                                                         |       |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------|
| 1. Risk based Optimal Ranking of Polluted Cities in a Fuzzy Environment:<br>A Case Study<br><i>Ashok Deshpande and Jyoti Yadav</i>                                      | 1-6   |
| 2. Reduction of Losses in Distribution Systems<br><i>Mohan Kashyap and Satish Kansal</i>                                                                                | 7-12  |
| 3. Use of DVR & LVRT System for Controlling the ESS in PMSG Turbine<br><i>Jai Singh Arya and Aman Tusia</i>                                                             | 13-19 |
| 4. Time Management<br><i>Himani Sharma, Amrita Mohan and Jagdeep Kumar</i>                                                                                              | 20-23 |
| 5. Effect of Rice Husk Ash and Sugar Mill Waste as Admixture on Clay Soil<br><i>Surbhi Lall</i>                                                                         | 24-29 |
| 6. Hop by Hop Virtual Energy based Authentication Scheme for Wireless Sensor<br>Network<br><i>Kusum, Sanjeev Kumar and Ankush Gupta</i>                                 | 30-35 |
| 7. Direct in Vitro Shoot Regeneration of Cicer Arietinum L. from Decapitated<br>Embryo Axes Explants<br><i>Jaya Srivastava and Pallavi Sinha</i>                        | 36-39 |
| 8. Study the Mechanical Properties of Hybrid Fiber Reinforced Concrete<br><i>Gaurav Nadda and Parvesh Rai</i>                                                           | 40-46 |
| 9. Use of Energy Efficient Electric Motors in Rice Mill Industry: A Case Study<br><i>Ranjit Singh and Arvind Dhingra</i>                                                | 47-50 |
| 10. Analysis of NoSQL Databases: A Comparative Study<br><i>Amandeep Kaur and Kanwalvir Singh Dhindsa</i>                                                                | 51-56 |
| 11. Analysis of Task Scheduling Algorithms using Cloud Computing<br><i>Amtoj Kaur and Kanwalvir Singh Dhindsa</i>                                                       | 57-61 |
| 12. Layered Structure Implementation Model for Trust based System Design in<br>MANETs<br><i>Renu Popli, Kanwal Garg and Sahil Batra</i>                                 | 62-67 |
| 13. Multivariable Control System Design for the Robust control of Twin Rotor<br>MIMO System using Quantitative Feedback Theory<br><i>Ambili Mohan and Gylson Thomas</i> | 68-76 |
