

Table of Contents

1. An Approach for Predicting Links in Social Network using Modified C4.5 <i>Kaustubh Mahajan and Bhamare M S</i>	1-7
2. Automated Detection of Microorganisms of TINEA using Deep Learning <i>Aditya Manelkar, Varad Jadhav, Sanket Alurkar, Chitra Bhole and Shital Amin Poojary</i>	8-13
3. Analysis of Preprocessing Algorithms for Face Detection using KNN and SVM Classifiers <i>Sai Sasank Varthakavi, Devisetty Rohith Prasanna Babu, Likith Kumar Reddy Singam Reddy and Remya Ajai A S</i>	14-21
4. Design Optimization of Shell and Tube Heat Exchangers for Cost and Pressure Drop by Genetic Algorithm (GA) <i>Haresh A Patel and Manish Pokharna</i>	22-30
5. A Preliminary Study of Grid Connected Wind Power System <i>Singh A K and Sourabh Prakash Roy</i>	31-37
6. Conceal Classified Data by using Xiao Steganography <i>Shruti</i>	38-43
7. Behavior of Bracing in High Seismic Region <i>Saikat Samanta and Awadhesh Kumar</i>	44-49
8. On-Line Detection of Rotor Broken Bars of Three Phase Induction Motor by Digital Signal Processing Method <i>Sharad S Dhamal, Bhatkar M V and Sonal S Dhamal</i>	50-54
9. A Pilot Study Examining the Factor Structure of Pittsburgh Sleep Quality Index in Indian Context <i>Arijit Dutta and Arindam Chatterjee</i>	55-62
10. A 32-Bit Altered Partial Product Multiplier for Low-Power and Low-Area Applications <i>Harsha Sree S and Hanumantha Rao S</i>	63-70
11. A Study on Various Plasmonic Waveguide Structures <i>Nishi G N and Viswas S Nair</i>	71-76
12. Optimization of Pressing Force Control Limits using Taguchi Method in Automobile Industry <i>Yogesh Chandwade and Parmeshwar Khendake</i>	77-81
