**Abstract**—Changing economic conditions and escalation of worldwide rivalry have given administration instruction an inexorably focal part in the achievement of people and partnerships. Management education has spread in the most recent fifteen years in India. Management education, now, needs a basic examination as just creating ability can take India forward. Management education has turned into a major business over the world.

**Index Terms**—Keywords.

## I. INTRODUCTION

The higher education framework in India has developed surprisingly, especially in the post – freedom period, to end up distinctly one of the biggest frameworks of its kind on the planet. Be that as it may, the framework has many issues of worry at present, such as financing and management including access, value and pertinence, reorientation of projects by laying accentuation on well being awareness, qualities and morals and nature of higher education together with the appraisal of foundations and their accreditation. These issues are essential for the nation, as it is presently occupied with the utilization of advanced education as an intense apparatus to assemble learning based data society of the 21st Century.

## II. MANAGEMENT EDUCATION SYSTEM IN INDIA

The Indian higher education framework is one of the biggest such frameworks in the World. There are likewise new difficulties of management and direction being confronted by these foundations, which require genuine consideration, both at the organizations in general society division furthermore those in the private area now developing at a quick pace. Accordingly, the old structures of management built up in pre-free India and working amid the majority of the twentieth century are presently required to experience radical changes. Moreover, the requests of the general public for value and convenience can't be dismissed any more.

## III. NEED AND IMPORTANCE OF THE STUDY

Because of the headway in the Information and Communication Technology and its applications there is limitless improvement and change in the structure and elements of the libraries. In this regard, there is 'Authoritative change' as the printed reports are changed over as computerized data sources and print based services, for example, course benefits in the libraries are changed as electronic data conveyance benefit. Thus, alongside the adjustment in structure, capacities and foundation in the libraries, the library and data

experts must change. In the sense, these experts must build up the ICT aptitudes now and again, as these abilities are changing from time to time. For this reason there is have to think about the data assembling and utilize propensities controlled by the clients in the Management College libraries in Belgaum area under V.T.U, Karnataka state.

#### IV. OBJECTIVES OF THE STUDY

The objectives mentioned as under.

1. To know about the level of services of the Management College libraries.
2. To evaluate and assess the level of knowledge, expertise and skills possessed by the Management library users.
3. To identify the constraints of Management user in accessing the information resources in the College libraries and ways to solve these constraints.

#### V. COLLECTION OF PRIMARY DATA

Collection of primary data is an important step in every research study. The research scholar will collect primary data through Questionnaire. A structured questionnaire will be designed of which first is to assess information need and use pattern behaviours of management users in the management college libraries.

#### VI. SCOPE AND LIMITATIONS

The study will cover about nine management college's library users. They are Anjuman Institute of Technology and Management, Bhatkal, Basaveshwar Engineering College, Bagalkot, BLDEAS College Of Engineering, Bijapur, Secab Institute Of Engineering & Technology Bijapur, KLS Gogte Institute of Technology, Belgaum, KLECET Belgaum, Angadi Institute of Technology and Management, Belgaum, SDM College of Engineering and Technology. Dharwad, B. V. Bhoomaraddi College of Engineering and Technology, Hubli

The statistical tool was used to analyze the data received from the questionnaire. The frequencies and percentages of the various support services used by management student respondents were calculated.

TABLE I. SEX WISE DISTRIBUTION

Sex	Respondents	%
Male	124	52.5%
Female	112	47.5%

Table No I shows the sex wise distribution of the respondents. There are 124 (52.5%) male respondents and 112 (47.5%) are female respondents. From this it is clear that male are more and female strength is poor in management colleges and in particular library use.

#### *The Knowledge Of Computers*

Options	Respondents	%
Yes	236	100%
No	0	0

From the above table is very easy to know that in the present day context. Students know that computer is essential for the livelihood. The management college students in responding to the Questionnaire hundred percent. Are make as yes.

#### *Type Of Information Do You Gather And Use For Your Work*

Reasons	Respondents	%
Course Related Materials	206	87%
R & D Information	78	33%
Bibliographical Information	66	28%
Current Information	210	89%
Conceptual Information	170	72%

Biographical Information	61	26%
Geographical Information	61	14%
Statistical Information	101	43%

Table No-2 shows information gathering and use by the respondents of management college libraries. Many of the respondents responded differently. 206 (87%) students are referring course related materials in the library, 78 (33%) are using R & D information, 66 (28%) are for Bibliographical information, 210 (89%) are for current information, 170 (72%) are for conceptual information, 61 (26%) are for biographical information, 33 (14%) are for Geographical information, 101 (43%) are for statistical information. From this table it is clear that course related materials and current information purpose students are making use of the library in management colleges.

#### *The Purpose for Which You Gather And Use Information*

Reasons	Respondents	%
Keeping up-to-date	228	96.5%
Evaluation	64	27%
Monitoring	87	37%
Research	56	24%
Studying	210	89%
For background reading	40	17%

#### *Table-3 Purpose and Use Of Information*

Table no 3 shows sum of the purpose and use of information by the respondents out of the 236 (100%) 228 (96.5%) respondents are coming with the purpose to update the knowledge. 64 (27%) respondents are for evaluative study, 87 (37%) are for monitoring, 56 (24%) are for research, 210 (89%) are for studying, 40 (17%) are for background reading.

The inference is respondents are going to the libraries to keep themselves up to date and for the purpose of studying in their respective subjects.

#### VII. FINDINGS

The findings of the study research study based on the analysis and interpretation of the study. The major findings of the study are as follows.

1. Majority of 124 (52.5%) male respondents and 112 (47.5%) are female respondents. Male respondents are more and female strength is poor in management colleges and in particular library use.
2. Majority of the respondents are 206 (87%) respondents are using course related materials in the library, and 210 (89%) are for current information.
3. Majority of the 228 (96.5%) respondents are coming with the purpose to keeping themselves update their knowledge.

#### VIII. SUGGESTIONS

Based on findings of the study the suggestions are given. The major suggestions are as follows

1. The authorities of the colleges should take an initiative in using the library and girl students should be given security so that girls students of the college can use the library.
2. The library resources should be made freely accessible. This will help the respondents to search their related information for their reading. For this libraries should have sufficient staff so that library can extend its services to its users.
3. The various tools to get information should be increased by the library and the staff and the same requirement should be fulfilled by the authorities of the college.

#### IX. CONCLUSION

The academic libraries will have numerous assets accessible with them as electronic media which will command later on as the Information Technology is quick making up for lost time the situation of library and data benefits everywhere throughout the world. These data administrations will be accessible in the electronic

and digital libraries. The move is supplier arranged to client situated. Economic thriving has coordinate linkage with the development of offices for access to data. With a specific end goal to meet the developing requests of the general public, the scholastic establishments are changing their educational modules furthermore acquainting new courses with satisfy the interest for the talented assets in different fields. This change has brought rather constrained the library experts to upgrade and define the procedure to coordinate user training into the course educational programs of academic organizations.
