

Table of Contents

1. A Comparative Study of Using Digital Twin Spark Ignition System (DTS-i) in Different Fuel Feeding System Used in Motorcycles: A Review <i>Abhishek Barua, Siddharth Jeet and Sasmita Kar</i>	1-7
2. Design and Fabrication of Triangular Patch Antenna for Airborne Radar Applications <i>Rohan Sai S, Sai Vishal Reddy S and Kamlesh Kumar</i>	8-16
3. Heat Transfer Augmentation Factor with Square Pin Fin Arrays <i>Sahoo L K, Roul M K and Swain R K</i>	17-24
4. Parametric Study of Material Removal Rate in SINKING–Electro Chemical Spark Machining Process <i>Mohan Charan Panda</i>	25-31
5. Review on Optimization of Abrasive Waterjet Nozzle Design using CFD Modeling <i>Triloki Nath Mishra</i>	32-36
6. Analysis of Mixture Parameters in a Diesel Engine Combustion Chamber <i>Padmalochan Prusty</i>	37-43
7. Experimental and Numerical Studies to Optimise Turning Process <i>Kumar P and Pradhan P K</i>	44-50
8. Preparation and Study of Nylon/CaSiO ₃ Composite <i>Ranjan Majhi</i>	51-55
9. Microstructure Analysis of Resistance Spot Welding of Commercial Low Carbon Steel using WC Micro-Powder <i>Samantaray B K, Hota N and Pani B B</i>	56-61
10. Analysis on Effectiveness of a Plate Type Heat Exchanger by CFD using Sea Water and Engine Oil <i>Chandan Kumar Sethi</i>	62-68
11. Prediction of Droplet Generation and Blowing Parameters During basic Oxygen Steelmaking Processes <i>Nayak J and Mitra A K</i>	69-77

12. Free-Form Fabrication- An Emerging Trend in Engineering 78-84
Siddharth Jeet, Abhishek Barua and Sasmita Kar
13. Online Appointments Booking System for CNG Pumps with Feedback 85-89
Analysis
Hamza Patel
